Postman

The screenshot displays the Postman interface for a REST client. At the top, a list of requests is visible on the left sidebar, including 't:3000/user/register', 't:3000/user/login', and 'mple.com/login'. The main workspace shows a POST request to 'http://localhost:3000/user/register'. The request body is a JSON object:

```
{  "name": "Jas",  "email": "jas@example.com",  "password": "12345"}
```

. The response is a 201 Created status with a message:

```
{  "message": "User registered successfully"}
```

. The interface includes tabs for Params, Authorization, Headers (7), Body, Pre-request Script, Tests, and Settings. The Body tab is active, showing the request and response bodies. The response is displayed in a JSON format, and the status bar at the bottom indicates 'Status: 201 Created', 'Time: 105 ms', and 'Size: 282 B'.
